Design-specific integration History On March 6, 1995, AutoCAD was launched in a public beta by Autodesk. AutoCAD was developed by a team of "experienced professionals in the technical field". The software was released to the public on March 6, 1995 at a cost of

US$3,000. The free version of AutoCAD was only released in December 2002. The free version of AutoCAD 2018 still uses the R13 or AutoCAD LT format. In 1999, Autodesk acquired the company Dimension Data which produced programmable logic controllers (PLCs), used to automate machines. The PLCs were used in building industry. On April 1, 2012, Autodesk released AutoCAD MEP, a version of AutoCAD supporting the workflow for mechanical engineering applications. The technology that led to MEP was

developed in the 1990s, however, it was first released by a third party with the name LEAP (at the time, LEAP was the only native mechanical engineering software that used AutoLISP and the ability to run AutoLISP in hardware made this software a contender in the field). In 2016, AutoCAD was "reimagined" and rebranded as Autodesk Design Suite, dropping the "Auto" prefix. In 2017, Autodesk launched its new subscription-based offering to compete with the other CAD programs. In 2017, Autodesk released a suite of products,

AutoCAD 360, which included a new version of AutoCAD, AutoCAD LT, AutoCAD Architecture, AutoCAD 3D, and AutoCAD MEP, all designed to work in a multi-screen environment. In 2018, Autodesk announced AutoCAD 360 2, a new version of AutoCAD and AutoCAD LT, which brought some design improvements, bug fixes and additional features. In August 2018, Autodesk released AutoCAD MEP 2019. In November 2018, Autodesk released AutoCAD Architecture 2.0. In January 2019, Autodesk released AutoCAD 360 2.0. In August 2019,

Autodesk launched AutoCAD 360 3.0. In December 2019, Autodesk launched AutoCAD LT 2.0. Issues Release history Autodesk AutoCAD has been released and updated in several versions 5b5f913d15
