The AutoCAD application was designed to assist engineers and architects in the creation of 2D and 3D engineering drawings and models. History [edit] AutoCAD is a commercial CAD application that was initially created by AutoDesk, Inc., and has since been bought by the Autodesk. The software is primarily used for drafting CAD models in the industry, but is also used for architectural, engineering, and mechanical purposes. AutoDesk developed AutoCAD by drawing on their experience creating other drafting applications, such as the earlier Desk-2D and the upcoming Desk-3D. AutoDesk's first AutoCAD project was for Andersen Windows, an iron and steel construction company in Santa Ana, California, in the United States. It was created to build a corporate logo on the facade of a new building, which AutoDesk referred to as the "invisible building". The first release of AutoCAD was in December 1982 for computers running DOS/MS-DOS, DOS/V, or an 8088-based IBM PC running MS-DOS. AutoDesk offered AutoCAD for free if the computer owner entered certain license agreement codes.[1] In 1983, AutoDesk released AutoCAD LT for the 286 class processors, which allowed users to work on a PC without having to use MS-DOS. AutoDesk released AutoCAD 2000 for the Windows platform in 1995. The initial release was in July 1995. The new application was much larger than the previous version and was a bit difficult for people who were used to previous versions of AutoCAD. AutoCAD 2017 was introduced in May 2015 at the AECO U.S. Business and Technology Show, with a version for web services to be released later. The feature of working on the same drawings on multiple devices was introduced with AutoCAD 2017.[2] In 2016, AutoCAD 2017 was used to design the new Airbus A380. AutoCAD is used by many industries, such as building owners, architects, engineers, contractors, developers, contractors, construction companies, industrial companies, mobile manufacturers, machine builders, marketers, and transportation companies.[3] According to an Autodesk report,[4] AutoCAD has been used by more than 35,000 architects and engineers in more than 190 countries and is installed on more than 5 million desktop computers.[5] Product history [edit] Autodesk has published the specifications of the AutoCAD

History The AutoCAD software program first appeared in 1986, and is available in several variations. The original version was originally based on AutoCAD LT, a component that was formerly part of AutoCAD. In 2010, AutoCAD XI 2010 became available as the first version of AutoCAD to be developed using Visual Studio. AutoCAD XI 2010 was later followed by AutoCAD XI 2011 and AutoCAD XI 2013, all of which were developed on the .NET framework. AutoCAD XI 2016 was developed on the Visual Studio .NET framework and the Foundation Class Library. AutoCAD XI 2018 was developed on the .NET framework and Visual Studio .NET, and was the first version of AutoCAD to be available for Windows 10. The first version of AutoCAD to be available for macOS was AutoCAD 200. AutoCAD 200 was also the first version of AutoCAD to be available for iOS and Android. AutoCAD LT 2008 became the first version of AutoCAD to be developed using Visual Studio .NET. AutoCAD 2010 for Windows was the first version of AutoCAD to be available for Windows 8 and Windows 7. So we will update you after having a home inspection. At the time of our purchase, we did not know what to look for. After working with Dave, we were able to get a home inspection and got our first step in the process. Eric and Jon Weimer We bought our house in June of 2011 and we are very happy with our purchase. I would highly recommend Dave and Tana to anybody that was wanting to buy or sell a home. Larissa Logan Dave's knowledge of the home buying process was incredible. He took a very in depth inventory and provided us with excellent assistance and feedback for purchase of our home. I would definitely recommend Dave to be your realtor to buy or sell your home. Donna Patin We would like to thank you for the outstanding job you did as our agent. We were very impressed with your professionalism, knowledge, and especially your integrity. We were fortunate to have you as our Realtor. Debra Grief We had our house for 6 years before we decided to sell. We had done everything we could to prepare our house for sale. When we decided to sell we got in touch with a Realtor who we knew from the internet. We were referred to Dave Cozias, who we worked with and now look forward to our next house. Dave is not a realtor with Realty Executives – he is his own boss. We found that we were better off dealing with Dave on his own, because his integrity was out-standing. We are very happy that we sold our home with the sale of our townhouse, which was not in great condition. Chris & Sandy Meyer We would like to thank you for a job very well done. It was a pleasure working with you. Nick & Debby “Debbie” Rice I think there is nothing more important than the people you work with. I went through an extensive and expensive process when trying to purchase my first home. I ended up hiring a realtor for the property who I found on the internet. I thought that was going to be the way it went, until the realtor I hired turned out to
