A feature of SE is that new users can ask questions, and new users can answer them. If the question is poorly asked, or of low quality, it may be downvoted. This is a fundamental part of SE. However, often poor questions will get answers. Some questions get answers which give wrong answers. This is another fundamental part of SE. For this reason, the user who asked the question is expected to leave comments asking the answerer to edit their answer. This is not always effective. Often the answerer will just say "I don't think I have anything to add to this", or they'll make the same point over and over again. Some questions, however, are poor, and have poor answers. Sometimes, even though the questions are clearly bad, someone will post an answer and become an "internet hero". Because the answer was upvoted, or accepted, they feel justified in not answering their own questions, but everyone else should. I was always impressed when someone posted an answer and then answered their own question, and felt it important enough that I marked the post as a Good answer. Sometimes it's not even clear that the answer is valid. In that case, what should be done? A: If you choose to respond to your own question, there is no requirement to respond with a "+1", nor should you be required to elaborate on your post. As far as I am aware, there is no policy against leaving a private comment to users who have already posted a response to their own question. If the question is closed, you're welcome to leave a comment for the question, or close the question as a duplicate. As a moderator, I just do not have the time nor the inclination to chase around individual users after they post a response to their own question. This is especially true if a user is someone I do not know, like if they are a first-time user. (The only situation where I do consider it acceptable to be personally helpful is if the first response on the question indicates that they are answering their own question, and their post appears to be a request for clarification on that question.) A: I want to clear up a bit of a misconception on this. No one 1cb139a0ed
