Upload your files to your friends directly from your PC Share your files over the Internet with Infini Do not have the app installed on your PC No registration required No permissions needed to make it a one-time use Download Infini How are Facebookers actually getting more efficient? It's not rocket science, people just get better at it. As a Facebook user I feel like I'm a complete moron all the time. But with technology, it's easier than ever to be more efficient. Here are 10 ways to get you started. 1. Use Facebook to create and manage your To Do List The To Do List is a super simple way to keep track of what you need to do for the day. It's like your own personal staff assistant and everything from a to do list can be done in just a couple of clicks. This way you are always aware of what you have to do and what you need to get done. The To Do List is easy to customize as well. You can make it an entire work day or just break down your tasks into smaller parts and let it work for you. 2. Use the Calendar Your calendar is your life saver. You know that you need to do that thing that you haven't been able to get around to yet. Well, you can just access your calendar and do it then and there. So much better than leaving it to chance. You can even upload important events to the calendar for a quick glance of what's going on in your life. So much better than checking your phone every 15 minutes. 3. Use Facebook to set up your groups Groups are the perfect way to find people that you want to socialize with. You can create a group for any topic that interests you. Or you can just use your groups to find friends, family, relatives, business partners and more. Your groups can become extremely important when it comes to networking. So much better than going out every night to chat with people. 4. Use Facebook to create your custom ads You can get a custom ad for a very affordable price. It's like being your own marketer. Your ads can be for any topic that you would like to talk about. No one needs to know you are offering a discount on an iPhone anymore. So you don't have to worry about boring your friends with it. Use Facebook to create custom ads that will be relevant to

What's New in the Infini?

iMediaShare is an awesome and easy to use free Android video file sharing application. It enables you to send, download and view videos, audio, and images. It comes with a large library of videos and images from various sites.
