Autodesk Exchange Server As a part of the Exchange Server 2016 release, Autodesk Exchange Server was renamed to Autodesk Services. Autodesk Services provide a set of services and integrated features for the secure exchange of corporate information. Autodesk Services have the ability to connect to: Autodesk Exchange Online, a cloud-based service that can sync corporate information Autodesk Online Fusion 360, a web-based application for 2D and 3D modeling, design, and collaboration. Autodesk Online Fusion 360 allows users to create and edit models and drawings using cloud-based technology. Autodesk Exchange Server 2015, an on-premises server that provides the same information exchange capabilities as Autodesk Services This new version added a centralized management console, enhanced discovery, and advanced security controls. Autodesk Exchange 2016 also added a private view. The Autodesk Exchange 2016 customer evaluation program is in place until 2018. When the program is complete, it will cost $25,000 (US$17,000) to use the service. History Autodesk Exchange was started in 2002 by Autodesk. In 2002 and 2003, Autodesk offered tools to create standalone emails and later Exchange 2003. In 2005 Autodesk launched Exchange 2007 to compete with both Lotus Notes and Microsoft Exchange. With Exchange 2007, Autodesk introduced a new interface that allowed the automatic synchronization of emails and files. Exchange 2007 also added support for the "Content Navigator", a search tool for mail and calendar folders. Another new feature, "Instant Messaging", allowed users to chat with coworkers, even if they are not online at the same time. In 2006 Autodesk released an improved Exchange 2007. It included the "Workspace," which was able to organize files in accordance to specific workflows, the "Archive," which was a content-tracking tool that can search through an archive of email messages, and the "Recycler," which is a search tool to help find files in various folders and archives. Autodesk Exchange 2007 also allowed users to create a preview for any document before sending it to a coworker or sending it to someone's mail account. In 2006, Autodesk Exchange introduced the ability to edit PDF files. Autodesk Exchange 2008 introduced the "Pocket," which is an electronic archive system that allows users to create pocket folders for specific files. Autodesk Exchange 2010 was the first version a1d647c40b
