### VASoftOnline SEO Promoter Crack+ Full Product Key Free Download For PC

VASoftOnline SEO Promoter, SEO Promoter is a professional tool developed by VASoft, and based on inbound links counting and linking checking technology. SEO Promoter is focused on inbound links, and you can also count outbound links. Google has expressed many times that outbound links are not considered in their search engine algorithm. So, SEO Promoter never counts outbound links. VASoftOnline SEO Promoter Features: ► Easy to use. And SEO Promoter can be started easily by one click from main interface. The layout of SEO Promoter's interface is friendly for any newbies. ► SEO Promoter can collect keywords and URLs from website, and then it counts and rates outbound links automatically. ► Very easy to insert different web addresses for targeting keywords in the website. For example, if you are a college student, you can set some keywords related to your college's name. So, your college website's inbound links will be counted up. ► SEO Promoter allows you to create different keyword groups, and then you can create multiple keyword groups and websites in one account. If you want to do some tests, you can remove this by click delete button. So, you can test different keywords with different websites easily. ► SEO Promoter can track your sites' ranking changes, and provide you with a detailed report. If you want to know how many keywords a site has, and their backlink counts, you just can check and count the report from SEO Promoter's table view. ► SEO Promoter can insert backlink profiles directly from Google, Yahoo! and MSN into the program, so that you can set up some keyword related backlinks with the same accounts easily. ► SEO Promoter can monitor your websites' rankings, and tell you where your website's ranking is good and bad. As you have set up many websites, you can monitor the statistics of your website one by one. This is very convenient for improving your ranking. ► SEO Promoter can track your websites' backlinks and keywords. You can select a website from the drop down list, and then check the keyword distribution. If you have many backlinks, you can view their backlink density by clicking the bar at the right. You can delete the links you don't want to track. ► You can also count the inbound links and outbound links of the specific page directly. It's more convenient than the manual way. ► SEO Promoter also

### What's New in the VASoftOnline SEO Promoter?

VASoft Online SEO Promoter is a handy and reliable SEO application designed to increase your rankings. As you know, your search engine rankings depend on lots of factors; these factors include your site quality & speed, keywords density, social networking sharing, etc. Actually list of factors becomes larger and larger with any Google update. However, the secret here is that main factor was, is and will be certainly inbound links count and quality. Google engineers can write anything they want in their blogs and articles, but page link popularity remains critical for any search engine. And SEO Promoter can supply you with a lot of free backlinks. That is why it is indispensable for anyone who wants to be successful in search marketing. Features: • SEO Promoter automatically creates and publishes XML sitemap. This is the way to notify search engines about your pages. • You will have full control over how and when to update your sitemap. • SEO Promoter also allows you to find pages in your site that are not in XML format. This is very useful for large sites. • SEO Promoter will submit your sitemap periodically to the major search engines. The frequency of the submissions will be customizable. • Find, analyze and improve links from page to page and from site to site. • Seo Promoter allows you to find/replace links within the XML sitemap. • Analyze the list of your pages and find the ones that are not being indexed. • Improve the SEO for these pages by submitting them to search engines. • Create new page from existing pages within your site. • Detect the number of pages that are indexed by search engines and update the sitemap accordingly. • Find pages and pages that don't have any links pointing to them. Create and submit them to search engines. • Find and replace links within the sitemap. • Analyze and show your site's search engine performance metrics. • Analyze the traffic on your site. • Analyze your competitors SEO performance. • Analyze your keywords and phrases. • Analyze your website's structure and your site's hierarchy. • Analyze the competition of your keywords and phrases. • Analyze your backlink popularity. • Manage your domains, subdomains and folders. • Create directories, subdirectories and subdomains. • Set up your own sitemap, in case you have many pages. • Gather lists of your pages by content and send them to you. • Control the access of your XML sitemap. • Create robots.txt file. I tried this tool, it is awesome tool and it helped me to
