An easier, more streamlined way to edit pictures is with the free Photoshop Express program, available for Windows and the iPad. Photoshop Express includes all the basic editing tools and works just as well. However, it lacks the many add-ons, such as an Actions panel and plugins, that you get with Photoshop. Digital painting Although Photoshop is largely known as a traditional editing application, Adobe offers Photoshop Elements to enable you to use it to work with images by digital painting — using a mouse. Photo Editing Tools Most Photoshop Elements editions include all the basic photo editing tools you need to crop, sharpen, flip, rotate, resize, and mask an image. But you can also add further editing tools with additional add-ons, such as distortions, exposures, filters, and special effects. The following sections describe some of the basic photo editing tools and their uses. Crop and straighten tools You can crop and straighten the edges of an image, or just crop part of it, using the Crop tool. (You can straighten an image only if it already has straight edges.) The Crop tool has eight preset crop sizes and a few more for custom sizes. If you want to crop the image in a specific size, you can change the preset crop sizes or enter the size you want. To crop an image, begin by choosing the Crop tool. You can then draw or drag the Crop tool around the part of an image you want to be cropped. The cropped area becomes highlighted, and the area that's not cropped appears dimmed. The edges of the dimmed area are the edges of the original image. For example, say you're making a photo book with a main image that has a blue border. You want to crop the photo so that the entire image is cropped, leaving the border dim. You then have to move the Crop tool away from the border so that it doesn't affect the original image. You can use a simple custom crop, such as selecting a square in the image to make cropping easy. In other words, you choose the dimensions of the cropping box, and the image is cropped. If you're working with a JPEG image, each square pixel within the crop box is cut from the original image. You can also use a box that's based on the proportions of the image in terms of inches and centimeters. Simply enter the dimensions in the box. If your image is

Q: When were the 47 Founding Fathers inaugurated? When was the exact date the Founding Fathers were inaugurated as "Founding Fathers"? Was it all at one time, or after the colonies won the Revolutionary War? Are there any sources of information on this? A: This is an issue that has been debated for quite some time. Some have claimed it happened at one time, others that the event should be called "formation" and therefore should occur at the time they became the first representatives from the colonies. In 2015, President Barack Obama made his own official statement on the issue, writing in part: I know there is a popular myth going around that George Washington and the other Founders weren't properly inaugurated. But it's just not true. It was also mentioned by George H.W. Bush in his 1992 State of the Union Address, but it has been noted that he was referring to a piece of legislation that "forbids elected officials from serving concurrently in both the legislative and executive branches." The relevant legislation that is referred to is the No Corporate Campaign Finance Act of 1990 which states that "(a) For purposes of this Act, the term 'elected official' shall include an appointed official." The United States Senate did consider and pass a resolution, discussed in more detail in the following Wikipedia article, concerning the issue: Resolution 96-6, adopted by the Senate on May 8, 1996, 96-6, the Senate voted the same day as the House resolution and the President signed the same day, to proclaim April 30, 1996, as National Founding Fathers Day. Thus, for those of us who appreciate the distinction between "national" and "Founding", the House of Representatives did specifically include the title "Founding Fathers" in its resolution, and the President signed the resolution on the same day. The rest of us can just note that the US Senate considered the matter and found that even if it had been pushed for, the proposed resolution would have met with strong opposition, and that the House and President had taken no formal action. Toward a self-healing, highly conductive, and robust, flexible, and transparent heater that functions as an antibacterial electrode. Maintaining good conductivity in a transparent and flexible electronic device is a challenging task. Herein, we report the fabrication of a conductive and self-healing heater via the incorporation of a triblock co-polymer containing conductive polyelectrolytes with a transparent and flexible homopolymer in a polyelectrolyte complex film structure. The polymer used in this study is a triblock co-polymer (PDMS-DVB-DVB-PDMS), where the polymer chains are attached to a glass substrate via a crosslinking agent. After coating, this co-polymer film was used as a resistive heater. We then performed thermal-conductivity tests and studies on its mechanical properties. We found that the obtained heater film not only had higher thermal conductivity (0.831 W/m-K) but also was more flexible (0.624 MPa) than most recently reported poly(3,4-ethylenedioxythiophene) (PEDOT) based films. The fabricated heater had good conductivity,

high stability, and repeatable performances (10 continuous electrical cycle, 2500 °C, 0.01 A/cm2). In addition, this heater exhibited high thermal conductivity as well as antibacterial activity against Escherichia coli and Staphylococcus aureus. Therefore, this study provides a promising material for a transparent, conductive, and self-healing heat source that can be used as a flexible and antibacterial electrode.President Trump went on the war path with his tweets, writing Friday he was determined to take down Harley-Davidson for moving its plant out of the U.S. in 2017. He also claimed he was creating a tax "reform" plan that would prevent any companies like Harley-Davidson from leaving America. Some economists are baffled by Trump's initial remarks, with one calling them a "potentially game-changing decision for the economy." Harley-Davidson, a prominent name in motorcycle manufacturing, announced last month that it will move a production facility to Europe, with the president "hanging out the big 'Made in America' sign for an Indian-made motorcycle," according to The Washington Post. "After decades of feeling mistreated
