AutoCAD was originally designed for architectural design, but has since grown to support the needs of other industries, such as electrical, industrial, mechanical and architectural engineers. The most common way of using AutoCAD is through the mouse. However, because AutoCAD is a drawing application, users are able to control it using keyboard shortcuts and the Draw toolbar and menu. AutoCAD basics AutoCAD is the most widely used CAD software application in the world. It allows users to create drawings that look almost exactly like 2D objects created using other software, such as PowerPoint or Illustrator. The drawings in AutoCAD are based on objects called blocks. These are typically black rectangles that contain text, dimensions and other drawing options. A drawing is created by placing blocks on the page in a series of layers. At any point in a drawing, the user can view the current layer and blocks on it and can add, move or resize blocks. The location of the mouse pointer, known as the "hand" is always shown on the screen, along with the insertion point and the cursor icon. The user clicks with the mouse to create an object in the drawing, and also to start editing the object. To navigate the screen, the mouse pointer follows the arrow buttons on the keyboard. Each arrow button moves the mouse pointer in

Video games AutoCAD software is frequently used as a 3D modeler for video games, including a very large percentage of World of Warcraft. This has led some to criticize the decision by Blizzard

Entertainment to add in AutoCAD for use in creating 3D modelers. Some players feel that this is a violation of the game's license agreements. In September 2007, Darsch Studios stated that it will no longer include AutoCAD within World of Warcraft and instead will provide access to a 3D modeling program to its customer base. In addition to being used for video games, it is also used by other software publishers for prototype and game design. Examples include Archimedes Design and Intel's Engima. The 2010 interactive computer-generated animated film, Alex and Me was created with Autodesk's Maya software. What's New in the AutoCAD?

Collaborate and maintain multiple designs in a single project. Using a new feature called "Markup Assist," teams can now save time by working on a common model, even if they don't have the same software. (video: 1:40 min.) Symmetry: Quickly create and edit symmetrical objects. A new "symmetry" feature within the object properties panel makes it easier to create symmetrical objects and edit them. (video: 1:25 min.) Visual Styles: Customize the look of your drawings with visual styles. Apply a style to a specific layer or drawing, then change the colors, fill patterns, linetypes, and more to customize the look and feel of your drawings. (video: 1:47 min.) Dimensions: Maintain your dimensions in a structured way. With Dimension Styles, you can easily save your current dimensions and automatically update them as you make changes to your drawings. (video: 1:25 min.) Drawing Tools: Smart tag editing: Create, manage, and edit all of the tag objects you need. With the new Smart Tag Editor, you can now tag objects and add tags more easily with tools designed specifically for the task. (video: 1:37 min.) 3D Dimensioning: See a 3D model of your drawing in real time as you add and edit dimensions. Zoom, rotate, and move your model around to view it from any angle. (video: 1:23 min.) Tool Palettes: Use a single Tool Palette to manage all of your tools and commands. When you create or change a tool, all of the commands and tools that use the tool are automatically updated. (video: 1:48 min.) Multiple Profiles: Save, load, and store multiple profiles to a single document. With a new feature called "Multiple Profiles," you can save multiple profile files and use them for various projects or users. (video: 1:45 min.) Customizable Application Groups: Group like functions together for easy access. You can now assign tools, dimensions, and other functions to Application Groups in the "Applications" menu, then drag and drop the groups to your drawings. (video: 1:25 min.)
