Have you ever received a message or notification from a Gmail address that doesn't seem familiar or just a little bit concerning? These are just a couple of the examples of the alerts we receive from our inboxes frequently that should be cause for concern! We all would love to know who is sending us emails such as these and most importantly whether or not it's intentional or unintentional. We were recently introduced to CheckGmail and decided to give it a shot. We had lots of questions and wanted to do a bit more research on it. CheckGmail is a free, simple, and powerful Gmail checker tool that lets you check your Gmail mailbox for errors, Suspicious activities, and to get an overview of your inbox. 1. Is it possible to run CheckGmail without any problems? It is entirely possible. CheckGmail has proven to be an effective tool that is being utilized by numerous users. Although it is a tool that allows you to view an email inbox and check for errors, I do recommend that you take a few moments to read the various details that it provides that can help you with specific issues that you may be having. 2. What if CheckGmail shows any suspicious activities? It's important to keep in mind that every email client and internet browsing tool allows you to see the emails that you have sent. Therefore, if you were to send an email from an unknown source,

### What's New In?

CheckBCC will let you know in detail if you are sending emails with CC or BCC fields to more than one person. Useful whenever sending bulk emails with lots of recipients, this Add-in can be configured to remind you of the fact that you're potentially sending unwanted content to many recipients at the same time. Furthermore, with a few tweaks, the list of field names to be hidden can be modified. Furthermore, the interface is clean and user-friendly. CheckBCC works with Microsoft Outlook 2010, 2013 and 2016. CheckBCC Features: \* Analyze and Analyze Email Message - Read all emails on your list - Save you from sending unwanted content to others: get a warning message to hide the content \* Import and Export User Profiles - Import any.csv profile - Export csv profile \* Export ALL checkings in.txt file - Export all statistics in.txt file \* Save all checkings in database - Save all checkings in database \* Export Report results to Excel - Export checkings to excel file Bug Fixes: \* Bug fix: some account info can be displayed even if there is no email address available in the address book Bug fix: different settings of hidden recipients can be displayed, even if the user has not chosen to hide the recipients field Bug fix: export can fail if the user isn't logged in Bug fix: by default email addresses can be hidden in BCC and CC fields only Usefulness: CheckBCC was created to tackle and prevent unwanted email sending to a large amount of different recipients. In this situation, it can make sense to fill up the CC or BCC fields with people that you actually want to contact. However, it is possible to accidentally send email content to some of these people that you're deliberately not trying to reach. In order to avoid this, you can use this add-in to automate the process of checking if there are more people than you want in the CC or BCC fields and that the add-in found the intended recipients while you were composing your email message. Furthermore, CheckBCC works with Microsoft Outlook 2010, 2013 and 2016. CheckBCC Features: - Analyze and Analyze Email Message - Save you from sending unwanted content to others: get a warning message to hide the content - Import and Export User Profiles - Import any.csv profile - Export csv profile - Export ALL checkings in.txt
