Elden Ring Features Key:

1. Unique Turnbased Shooter Battle System A turn-based shooter battle system in which you can enjoy the action of full cooperation.
2. Bloody Combat, a Fight to the Death The attack and defense systems used in RPGs have both been simplified and made more natural.
3. Interlocking Systems Systems that smoothly connect the game and the world's game are interwoven throughout the game. By expanding the game world, you are able to help the people you encounter on your travels.
4. Online Game play PvP and cooperation-based multiplayer game play that allows you to experience the world of the Lands Between in conjunction with other players.

Character Creation

You can freely choose from the class of Warrior, Magus, and Wizard, and customize your character.

Basic Weapons and Accessories

The weapons and accessories that characters wield are determined by the class of characters they can select at the beginning of the game.

Arcane Casting System

Arcane magic has been added to Mystic Artes, an alternative to the previously slow-paced class creation process that uses a Flow Chart.

In a Flow Chart, any number of parameters can be added to the Magic Power category of a character, and any number of skills can be assigned to the Magic Mastery category. However, the number of skills available in each category is limited, so if you choose the most powerful skills in each category, the maximum Magic Power will decrease.

Evolution System

This new system allows you to select and collect different Evolution Material—materials suitable for Evolution—on your journey.

You can gauge the Evolution Potential of the materials by viewing the number of evolution milestones that have been achieved on the upper-right corner of the screen.

In this manner, you can collect materials that are useful for gaining progress in the evolution of a specific character or a high amount of all characters.

IE8 renders the two forms as expected. Any thoughts? Thank you
