The development team of the Elden Ring RPG Project is planning to release a new fantasy-action RPG game in spring 2015 on PlayStation 4. The game was officially announced at the "2015 Spring Dengeki Game Awards", and the first gameplay demo was released in December 2014. Details about the Elden Ring RPG Project: Official website: Twitter@ZEST_JP Media ContactSakiba211@yahoo.co.jp Acute and chronic pancreatitis: changes in pancreatic fat on MR images. To evaluate patterns of pancreatic fat change in acute and chronic pancreatitis. Eighty-seven patients with acute (n = 16), chronic (n = 30), or transient (n = 41) pancreatitis underwent magnetic resonance (MR) imaging for evaluation of acute pancreatitis or follow-up after treatment of chronic pancreatitis. The dynamic nature of pancreatic fat was investigated. In all patients, pancreatic fat was homogeneous in early phases of dynamic imaging and heterogeneous in delayed phases; this pattern was absent or reversed in chronic pancreatitis. Chronic pancreatitis frequently was associated with pancreatic atrophy. The presence of pancreatic atrophy and fat signal homogeneity in acute pancreatitis were independent predictors of a benign disease course. Reduction of pancreatic fat on MR images may be indicative of chronicity of the process.# Copyright (c) 2020, NVIDIA CORPORATION.
