By using this engine, we can make the game beautiful, enrich its contents, and add features that we couldn't add before. • A New Style of Spatial Adventure Based on Dynamic Geometry All scenery is created dynamically through the use of our own 3D technology. Online game: Fantasy game: I enjoyed the most playing the EDGE OF XENO.The graphics weren't bad but the character design was a bit different from other RPG games. (If you're going to do character design make the characters more distinct with unique appearance)
The game play mechanics were fairly easy and it wasn't difficult to learn the game. You should make sure that you're familiarized with the game's interface. (You must know how to use the map, items, skills, and trade items.) There was still a bit room for improvement in the game but overall I liked the game. (If you really want to enhance the game play) It's a good RPG game with a good story and overall experience. You can always play this RPG game. P.S. Other than the title, the game play is pretty good. It's basic RPG game but it's okay to try the game out. A player of the game: I'm an RPG lover.
