VistaPro

Hello, This is my first PC game, I made it in 2016 in the IGF entry competition, and I believe it reached a reasonable level. Not a lot of people will play it, but it's something I'm quite proud of. I used a lot of my own programming experience and a bunch of free online resources to make this game. It uses only OpenGL. Install: 1. Open Steam 2. Download 1. Unzip the file 2. Run the exe Controls: (Only for test purposes, I recommend using steam for controls) Hi, I created this here as an exercise to learn to use CG, I'm still learning and I want to get better at this, I would be interested in working with you if you could help me with the tutorials and send me questions. Like you will notice, I chose to make a PC for now, I have been concentrating on making PS1 games, I have not started yet on the PC but I will be making a PC one day, and when I do, you will be the first ones to know. Follow me on Twitter: @TorkanMcriftee is my twitter acct, I'll try to get better at making video's. I'm going to start on the new PC first, before the PS1 games.
