Meta-analysis of treatment options for abnormal uterine bleeding in menorrhagia. This meta-analysis was performed to determine the effects of health care interventions for abnormal uterine bleeding (AUB) in menorrhagia. The Cochrane Library, PubMed, MEDLINE and EMBASE were searched for studies of the treatment of AUB in menorrhagia that were published from the date of their inception to May 2013. We systematically selected randomized controlled trials (RCTs) and non-randomized controlled trials (N-RCTs) that included the treatment of AUB in menorrhagia. The effect sizes for each intervention were calculated using relative risk (RR) and 95% confidence interval (CI). We included 10 RCTs (9 N-RCTs, one RCT) with a total of 2503 participants (1279 in the treatment group and 1224 in the control group). Meta-analysis of the three RCTs showed that the proportions of participants whose abnormal uterine bleeding was cured at 3 and 6 months after treatment were 54.5 and 93.4% (RR: 3.59, 95% CI: 2.
