Although Adobe Photoshop and Adobe Photoshop Elements have existed for a long time, this guide is a combination of how tos published earlier and some brand new material. If you already have experience with Photoshop Elements, you can skip over to the section "Adobe Photoshop Elements". Most of this guide was made using Adobe Photoshop Elements. The process on this site is as follows: we first provide detailed instructions with visual images to give you a broad overview on how to do the task. Then we tell you how to modify or create these images, and we provide images of the final product if applicable. Table of Contents Suggested reading You might want to start with Adobe Photoshop and Photoshop Elements chapter 1: The first chapter describes how to use Photoshop Elements and explains the basic options and features that you can use. You should read this first. This guide explains the tools in detail. We cover the most common tools in this guide. You might want to read: Chapter 2: Typing Chapter 3: Editing Images Chapter 4: Copying and Pasting Chapter 5: Erasing Chapter 6: Filters Chapter 7: Masking Chapter 8: The Brush Tool Chapter 9: The Clone Tool Chapter 10: The Fill and Stroke Chapter 11: The Gradient Tool Chapter 12: The Selection Brush Chapter 13: Layer Masks Chapter 14: Puppet Tools Chapter 15: The Channels Chapter 16: Saving your Work Chapter 17: The File System Chapter 18: The Automate Chapter 19: The Arrange Chapter 20: The Distribute Chapter 21: Watermarking Adobe Photoshop Elements We have made a special guide for Photoshop Elements. It explains the principles of how Adobe Photoshop Elements works and gives you step by step instructions on how to edit images with the software. This guide is a little longer than the guide for Photoshop. If you are already experienced with Photoshop Elements, we recommend you to read this guide first. Steve Martin's Tusker "Steve Martin's Tusker" is a song by British singer-songwriter Steve Martin. It was released in January 1985 as his debut single. Martin had just two demos made for Polydor Records, who were unsure if the singer could achieve success in the UK. Producer Peter Walsh believed that Martin's best-received compositions to date were more commercial in nature than his earlier compositions and believed that this song was the perfect single for Martin's US audience. The song was covered by Hong Kong singer Carol Cheng in her album In a Tea Shop. Track listing 7" Single A. "Steve Martin's Tusker" – 3:53 B. "You Can't Hurt Me" – 3:51 Awards and nominations ASCAP Awards Won: Top Pop Song/Won: Top Vocal Performance by Male Artist for "You Can't Hurt Me". But when I add a parenthesis to it like print (-1 - (1)) It does not work: --- TypeError Traceback (most recent call last) in () ----> 1 print (-1 - (1)) TypeError: unsupported operand type(s) for -: 'int' and 'builtin_function_or_method' I expect that it should be the same as in case of mathematical expression. A: -1 - 1 results in -1 and 1 as a tuple (which is int) after that the (-1) operator is applied. You're trying to apply the sub() method to a int and int method to int. Print does not care what is inside the parentheses. The parentheses are simply to indicate to the python interpreter what is being interpreted. You could use: from operator import sub, int print

Q: Creating database for iOS I want to create database for my iOS app. Do i need database service (like MySQL, Postgres, MongoDB) or can i create database in my app and use SQLite? Is there any other method for creating db? A: It is recommend to use Realm for iOS. A: You should try Realm. It is similar to SQLite, but you can sync data between devices/ simulators. Realm is also already included in the iOS SDK since version 6.0. You only need to add the supporting code: Add: #import Create: RLMRealm *realm = [RLMRealm defaultRealm]; Use: NSArray *realmResults = [realm objectsWhere:@"status = 1"]; // If you want to create objects programmatically: realm.addObject(@{@"name":@"john", @"lastName":@"smith"}, nil); // If you want to update existing objects: realm.addObject(@{@"name":@"z", @"lastName":@"smith" }, nil); // If you want to delete objects: realm.deleteObjects([realmResults objectAtIndex:0]); // See the full documentation here : Be aware that Realm.io is not free. For a limited number of free users they will give you a free developer license when you register here.
