A revolutionary game, Thunder Gun: Revenge of the Mutants is a third-person shooting game where you must defend earth against enemy robots by using a powerful gun that shoots lightning. Complete the game in this story mode or play challenges, which are unlocked by playing the game. Unlockable characters, costumes, and more are included! Customize your character with unlockable customization options, perks, and characters as you work your way to becoming a global hero. For the first time in an arcade shooting game, you can boost shots by stacking powers while chaining projectiles between shots. Enjoy this hardcore arcade shooter on support for both the Xbox One and the PlayStation 4. Strikingly beautiful and highly customizable. I absolutely love the soundtrack, it's simple and uplifting. The graphics are vibrant and the gameplay is fun, challenging, and addictive. I am constantly on the look-out for the next challenge, with endless replayability. Forget "No Man's Sky," this is where it's at! Thunder Gun's combination of graphics, sound and gameplay are just amazing. For people who love shooter games, there's no other game on the market like this one. I would definitely recommend it to people who love the games that you might of heard such as No Man's Sky and Destiny 2. I know this for a fact because I've played all 3 of them. The only negative thing I can say is that there is very little choices to make on the game aside from the different weapons, and some different maps. The game is perfect if you like action based games. But if you want an RPG/Role playing game with some shooting, this is not that game, it's not even close. As soon as I started to get attached to the characters and got invested in the story I realized that this isn't the kind of game that people would of made. But that isn't a bad thing because I really loved it so much that I kept playing. I loved the game from day one. I played it over and over again for a couple of days when I first got it. I played it until I got tired of it and then started over again. I loved the game so much that I searched to see if there was a way to "peek" at what people were playing on their computers. I found no search results so I created one. Please find the link to it below. I can't say what really made the game so good. It was very easy to get
