Unable to get correct UTC time in local time I am trying to make a web application for a football website using javamail to send a message to a chat. I can get everything done except sending the message at a correct time, but it seems that I can't get the time correctly. I set my time to Australia

eastern standard time (AEST), but when I click the send button, the message is sent at a different time (UTC time) than it is at. Also, when I click the refresh button on the timetable page, I get a time that is not in AEST. So, I can't even get to UTC time! Here is my code: `DateTim
utcToday = new DateTim`

e(DateTime.now().getYear(),DateTime.now().getMonth(), DateTime.now().getDay(), DateTime.now().getHour(), e79caf774b
