The Rabbit and The Owl is a narrative-driven puzzle platformer built for cooperative play and interpretation. The titular characters are two kindred spirits who are confined to a realm of light and dark, and are only able to progress through constant cooperation. Each puzzle requires you to navigate the world and utilise the characters' special abilities to reach their respective goals. The game is set in the ancient world of Yril, a once vibrant land now a faded shell of its former self. At an uncertain point in time, two kindred spirits have manifested themselves as the Rabbit and the Owl. You will guide them through tranquil forests, harsh deserts, crumbling cities, and more, through a tangled web of supernatural phenomenon and ancient mythology. Read more: [Gameplay Features](#): - Rich puzzles: The game naturally introduces and teaches puzzle-solving concepts as you progress. Each puzzle may draw on concepts learned before, but always has a specific light bulb moment that is unique only to that level. Variety is the spice of life! - Low mechanical skill ceiling: Mechanical execution of moving the characters, activating switches, using special abilities, etc. is designed to be less demanding for players who may not be the best at platformers or games in general. The puzzles are mostly solved through careful analysis of what to do -- the difficulty of actually completing them is kept to a minimum. - Atmospheric, cohesive aesthetics: Unique, painterly artwork for every level and a soothing, original soundtrack to complement the game and the story. Q: open a modal using button in jquery I want to open a modal with button using jquery. How can i do this? Thanks A: try this Your content
