First select the library. Then, you can select a template, a line or a curve, etc. If you select "AutoCAD Keys" on the Library list, you can choose the key to enter the Autocad. You can even get a normal key, and there are a lot of keys! Los Angeles Angels of Anaheim first baseman C.J. Cron recorded the first four home runs of his Major League career this season. (USA TODAY Sports) LOS ANGELES — C.J. Cron spent a lot of time in his driveway growing up in San Diego, hitting balls off of the garage door. That helped hone the talents of the first baseman. In 2017, Cron went on a run of hitting home runs that has carried over into the 2018 season. He is currently tied for the major league lead in home runs with 17. He's tied for first in home runs among American League first basemen, and the Angels have benefited greatly from his power. The Angels offense has taken off since the All-Star break, going 13-2 in the 16 games since that break. The Angels rank fourth in the American League in runs scored (352), and their .312 average at home is second in the league behind the Houston Astros. The club has gone 33-13 since the start of the year, and 17 of their last 20 games have been decided by one run. "I think we have a pretty good mix of guys right now," Cron said before the Angels hosted the Boston Red Sox for three games this week. "We have some guys that can drive the ball and we also have a lot of guys that can make plays in the field, guys that can do a lot of different things. We're just trying to be as versatile as we can. If one of those guys goes down we have plenty of guys that can take the lead role." Cron was a focal point of the offense during the first few months of the season. A quick glance at the statistical table that comes with each of his home runs would indicate that he's getting deep into the count. He's yet to hit a home run in the first two or three innings of an at-bat. And he's gotten that far just seven times in his first 17 major league home runs. Still, his ability to make contact has provided some consistency to the Angels' offense, which has relied on a lot

What's New In?

Incorporating Feedback from Directories: Use Directories, a powerful tool that helps you categorize feedback into Action items, Notes, and Comments. That way, you can see which items require your immediate attention and which items you can leave for later. Set up folders to organize your feedback and improve the efficiency of your review. Ability to open previously imported files. Importing and incorporating feedback has never been this easy. Zooming and cropping views: Increase your readability by zooming into and out of the drawing. Adjust the zoom level and crop the view to ensure that you are only seeing the areas that you want to work with. New intelligent Navigate features, including: Navigate while editing: Use the new Navigate While Editing feature to have AutoCAD recognize what you're editing and update the move tool accordingly, without changing the editing mode. Navigate while editing enables you to quickly edit your drawing. Navigate without moving: Use the new Navigate Without Moving feature to navigate to any location in the drawing while editing, without changing the editing mode. Expanded features for navigating on a map: The Navigation bar's button to scroll through the map is now closer to the top of the screen. The map's map menu is now more intuitive. The scroll bar is now located at the bottom of the map. The zoom level indicator is now located at the bottom of the map. The update rate of the map's size indicator is now faster. The map is no longer automatically scrolled to show the current location. The map's zoom level indicator now shows the current zoom level. The map's bookmark is now located on the left of the map. The new Map tool allows you to zoom in or out, move the map, and navigate. See the results of your edits immediately. AutoCAD now uses a new tool, Feedback, to automatically update your drawing. Copy to clipboard, and paste into other applications. Copy your drawing to the clipboard so that you can use the Quick Commands tool to paste it elsewhere, or you can paste the drawing directly into a document. (video: 1:45 min.) Copy and paste: Copy your drawing to
