Thursday night at the Drake Hotel. It's an event that should be on your calendar! Don't miss the live performance by Sturgill Simpson! As we mentioned last week, we are running a virtual reading series with the help of Little Rock Heritage Project. We are featuring stories written by the talented young people in their summer reading program. We are following in the footsteps of the ALA and showcasing stories written by K-5th grade students. These students (and their teachers) will read a story, have us record an interview and record a podcast on the subject. We started with "Ladybug" and it's a great first story. Here is a link to the interview we recorded with Alisha and her mom and the story itself. Ladybug Alisha and her mom were vacationing

in the Outer Banks in North Carolina in August, 2004. As they were sitting on the beach watching a surfer wave, they saw a ladybug land on the sand in front of them. The woman's child ran over and scooped it up and was going to bring it back to her. The ladybug turned its head and looked directly into Alisha's eyes. Alisha felt overwhelmed. She started crying. Her mother was yelling at her to snap out of it and Alisha didn't want to. She was embarrassed. Then, something happened to the ladybug that she couldn't explain. The ladybug's eyes turned green. Alisha said, "I knew I had a story to tell. I just knew it." Visit our website for more stories, archived stories and other information
