1 / 2](http://Effect of analogs of epinephrine on adrenergic receptors in rat brain. Eleven analogs of epinephrine, including six analogs of metaraminol and three analogs of ephedrine, were examined for their abilities to inhibit the binding of [3H]dihydroalprenolol (DHA) to membranes of rat brain. Binding was inhibited completely by the three analogs of ephedrine: 3-methyldopa, oxymetidine, and the beta-anhydro compound of ephedrine. Analogs of metaraminol with an oxidized methoxy group at the side chain had little or no effect. Epinephrine and the alpha-anhydro derivative of metaraminol were weaker inhibitors than 3-methyldopa. Of the analogs of epinephrine with reduced potency, 3-bromoepinephrine and 3,4-dihydroxybenzhydryl amine were the most potent inhibitors, while dihydroxybenzyl amine and a derivative of epinephrine with a primary alcohol and a hydroxyl group on the side chain were also effective inhibitors. These data indicate that hydroxyl groups in the side chains of the analogs have a greater influence on their actions than the methoxy group on the side chain of the parent compound. Here we go again: the True Detective season two teaser trailer is here, and it's just full of unholy images, terrifying sound effects and a genuinely terrifying face. The teaser is brief, but impossibly engrossing. See it all at once: Yep, it's a one-minute, silent teaser. But it's a tour de force, featuring no less than 13 giant images. The teaser packs in (and then some)</p></div><div data-bbox=)

the season's most prominent images: the literal and figurative King Tut's funeral mask, Mariana's inexplicable hoodie, and even Matthew McConaughey's sand-covered pants, which seem to suggest that he's got a lot of dirty laundry that he can't possibly keep under control. There's also, I think, a stethoscope photograph, though I could be wrong. Right off the bat, the teaser is a shock, not just because of its lack of dialogue but because it seems to represent a sudden, horrific shift in tone.
